SUMMARY

Computer Science student at NIT Jalandhar (CGPA 7.86/10) with production experience in full-stack development. Deployed 1 Azure web apps and 1 confidential Defense project custom computation engines, and mathematical models. Skilled in Python, JavaScript, C++, RESTful APIs, MySQL, Microsoft Azure, Git, and competitive programming (300+ LeetCode solves, Codeforces contest). Seeking entry-level opportunities to build scalable, high-performance applications.

TECHNICAL SKILLS

Programming Languages : Python, C, C++, JavaScript

Web Technologies : HTML, CSS, JavaScript, DOM Manipulation, Responsive Design, Full Stack Web Development, Frontend Development

Backend &APIs : RESTful APIs, Flask, HTTP, JSON, CRUD Operations

Databases : MySQL, DBMS

Cloud & DevOps: Microsoft Azure, Azure App Service, Git, GitHub, Version Control

CS Fundamentals: DSA, Object-Oriented Programming (OOP), Computer Networks, Operating Systems, Machine Learning

Tools & Platforms: VS Code, Figma, Geofencing

Soft Skills : Communication , Agile Development, Problem Solving, Teamwork & Collaboration, Adaptability, Time Management

WORK EXPERIENCE

Software Developer — ***Indian Army — Confidential Project***
Freelance Contract — *December 2025 - April 2026*

- Architected and shipped 1 full-stack localhost web application for ballistic computation used by an Indian Army stakeholder, meeting 100% of specified accuracy requirements.
- Programmed a JavaScript mathematical computation engine processing many ballistic parameters per query in less than 12 seconds (standard
- manual time 12 seconds)
- Executed complete SDLC across 4 phases — requirements, design, development, delivery — testing is ongoing.

PROJECTS

AgriMarketProfitOptimiser — ***Academic Project | NIT Jalandhar***
Python, Data Analysis, Optimisation — *August 2024 – December 2024*

- Developed a decision-support system to help farmers identify the most profitable markets for selling crops
- Analysed crop prices across multiple markets to compute optimal selling locations and expected profit margins
- Enabled data-driven decision-making to improve farmer profitability

Mess Activity Tracker — ***Personal Project***
Python, REST API, iPhone Shortcuts, Geofencing — *June 2025 – July 2025*

- Automated 100% of mess entry/exit logging via iPhone Shortcuts geofencing and a Python REST API backend, eliminating daily manual tracking for self use..
- Achieved under 500ms average API response time for real-time POST requests with MySQL persistent storage.

Research Document Dashboard — ***Academic Project | NIT Jalandhar***
JavaScript, HTML, CSS, Microsoft Azure App Service — *August 2025 – December 2025*

- Deployed a full-stack web dashboard on Microsoft Azure App Service for 50+ academic documents, cutting retrieval time by 70% through dynamic client-side filtering.
- Launched to Azure cloud within 1 day, completing the full deployment pipeline from local development to live production environment.

EDUCATION

B.Tech — Computer Science & Engineering — **August 2024 – May 2028**
NIT Jalandhar (Dr. B.R. Ambedkar National Institute of Technology), Punjab, India — ***CGPA: 7.86 / 10 (GPA : 3.14/4)***

- Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Computer Networks, Operating Systems | Top 20% of class by CGPA.

CERTIFICATIONS

- Microsoft Azure — Hands-on cloud deployment via Azure App Service | December 2025
- LeetCode — 300+ problems solved: Arrays, Linked Lists, Trees, Dynamic Programming | 2024 – Present
- Codeforces — Rated competitive programmer, 5+ contests completed (Handle: sandeepy.cs.24) | 2024 – Present

ACHIEVEMENTS

- Completed 1 classified Indian Army application on time with almost 100% accuracy (March 2025); launched 1 Azure production app with 1 year uptime (December 2025 - December 2026).
- Solved 300+ LeetCode problems across Arrays, Trees, DP, and Graph categories; competed in 5+ Codeforces rated contests.
- Achieved **2nd Place** in a competitive Mobile Security Bootcamp conducted in collaboration with **IIT Jammu and NIT Jalandhar**, showcasing proficiency in Android/iOS security, reverse engineering, and mobile penetration testing.
