SUMMARY

Computer Science student at NIT Jalandhar (CGPA 7.86/10) with real-world production experience in full-stack development. Solely architected and developed a confidential Defence computation system for the Indian Army — directly contracted — processing ballistic calculations in under 5 seconds using JavaScript, Python, and HTML/CSS. Deployed 1 Azure production web app and solved 400+ LeetCode problems across DSA topics. Seeking a software engineering internship to build scalable, high-performance systems.

TECHNICAL SKILLS

Programming Languages : Python, C, C++, JavaScript, SQL

Web Technologies : HTML, CSS, JavaScript, DOM Manipulation, Responsive Design, Full Stack Web Development

Backend &APIs : RESTful APIs, Flask, HTTP, JSON, CRUD Operations

Cloud & DevOps: Microsoft Azure, Azure App Service, Git, GitHub, Version Control

CS Fundamentals: DSA, Object-Oriented Programming (OOP), Computer Networks, Operating Systems, Machine Learning

Soft Skills : Communication , Agile Development, Problem Solving, Teamwork & Collaboration, Adaptability, Time Management

WORK EXPERIENCE

Software Developer — ***Indian Army — Project Collab***
Freelance Project ***(Demo link)*** — *December 2025 - Ongoing*

- Solely engineered a confidential full-stack ballistic computation web app directly contracted by the Indian Army as the only developer across the entire 5-6 month lifecycle.
- Built a JavaScript and Python computation engine processing multiple ballistic parameters in under 5 seconds, reducing manual calculation time by 100% and eliminating human error.
- Developed real-time data input/output system with interactive dashboard visualization enabling non-technical military personnel to operate without any technical assistance.
- Executed complete SDLC solo across 4 phases — requirements, design, development and testing — delivering automated report generation for Army personnel under a confidential defence contract.

PROJECTS

AgriMarketProfitOptimiser — ***Academic Project | NIT Jalandhar***
Python, Data Analysis, Optimisation — *August 2024 – December 2024*

- Built a Python decision-support system to identify most profitable crop-selling markets.
- Analysed crop prices across multiple markets using Pandas and NumPy data processing.
- Implemented optimisation algorithm computing optimal selling locations for maximum profit.
- Enabled fully data-driven recommendations eliminating 100% manual market calculation.

Mess Activity Tracker — ***Personal Project***
Python, REST API, iPhone Shortcuts, Geofencing — *June 2025 – July 2025*

- Solely built automated mess entry/exit logging using iPhone Shortcuts geofencing triggers.
- Developed Python REST API backend eliminating 100% of manual daily tracking effort.
- Achieved under 500ms API response time for real-time POST requests.
- Persisted all geofence event logs accurately using MySQL storage layer.

Research Document Dashboard — ***Academic Project | NIT Jalandhar***
JavaScript, HTML, CSS, Microsoft Azure App Service — *August 2025 – December 2025*

- Solely deployed full-stack web dashboard on Microsoft Azure serving 50+ academic documents.
- Reduced document retrieval time by 70% through dynamic client-side JavaScript filtering.
- Completed entire cloud deployment pipeline from local development to production in 1 day.
- Built responsive UI ensuring seamless access across both desktop and mobile devices.

EDUCATION

B.Tech — Computer Science & Engineering — **August 2024 – May 2028**
NIT Jalandhar (Dr. B.R. Ambedkar National Institute of Technology), Punjab, India — ***CGPA: 7.86 / 10 (GPA : 3.14/4)***

- Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Computer Networks, Operating Systems | Top 20% of class by CGPA.

CERTIFICATIONS

- Microsoft Azure — Hands-on cloud deployment via Azure App Service | December 2025
- LeetCode — 400+ problems solved: Arrays, Linked Lists, Trees, Dynamic Programming | 2024 – Present
- Codeforces — Rated competitive programmer, 5+ contests completed (Handle: sandeepy.cs.24) | 2024 – Present
- Participated in 1-2 Hackathons — achieving finalist/winner position in competitive coding and development challenges
- Mobile Security Bootcamp Certificate — IIT Jammu and NIT Jalandhar collaboration | 2024

ACHIEVEMENTS

- Completed and delivered 1 classified Indian Army defence application as sole developer with 100% accuracy (December 2025 – Ongoing)
- Solved 400+ LeetCode problems across Arrays, Trees, DP and Graph categories; competed in 5+ Codeforces rated contests
- Achieved 2nd Place in Mobile Security Bootcamp conducted in collaboration with IIT Jammu and NIT Jalandhar
